> But if any human being earnestly desire to push on to new discoveries instead of just retaining and using the old; to win victories over Nature as a worker rather than over hostile critics as a disputant; to attain, in fact, clear and demonstrative knowledge instead of attractive and probable theory; we invite him as a true son of Science to join our ranks.

Sequence stratigraphy and architectural variability in growth fault-bounded basin fills: a review of Plio-Pleistocene stratal units of the Crotone Basin, southern Italy

MASSIMO ZECCHIN, DONATELLA MELLERE & CESARE RODA

The ornamentation and line quality of Figure 1 became corrupted after the authors checked their proofs. The correct figure is printed below. The online version has been corrected.
